

# Global Command and Control System-Maritime (GCCS-M)

---

## SYSTEM DESCRIPTION

The Common Operational Picture (COP) Master allows platforms on the Global Command and Control System-Joint (GCCS-J) and Global Command and Control System-Maritime (GCCS-M) systems to exchange track and other Command and Control (C2) related data such as Overlays and Position of Intended Movement Tracks (PIMTRACKS). It must be noted that the information contained for this interface is not intended to fully describe what occurs on the GCCS-M side (e.g., Force Over-The-Horizon Track Coordinator (FOTC)) but rather what occurs between the GCCS-M and GCCS-J systems.

## INTEROPERABILITY CERTIFICATION STATUS

Please refer to the [Joint GCCS Interoperability Status Table](#)
